### DETAILED ACTION

The following action is in response to application 10/711,203 filed on September 1, 2004.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6-7, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Wakashiro '332. With regard to claim 1, Wakashiro teaches method for inhibiting stalling of an engine of a hybrid electric vehicle, the hybrid electric vehicle including a power transfer unit 4 adapted to drive a vehicle wheel and having a plurality of gear ratios and at least one power source 9 adapted to drive the power transfer unit, the method comprising: determining whether the engine is running S23; determining whether a gear ratio of the power transfer unit is selected S27; and implementing a stall mitigation strategy S33 (Col. 1, lines 25-28) for a predetermined period of time TMSSILDL if the engine is running and a gear ratio is selected. With regard to claim 6, Wakashiro teaches the method, further comprising the step of terminating the stall mitigation strategy if an engine speed NE is greater than a second threshold speed value NEDSILH; S22. With regard to claim 7, Wakashiro teaches the method wherein the second threshold speed value is greater than an engine idle speed (Col. 4). With regard to claim 10, Wakashiro teaches the method wherein the hybrid electric vehicle further comprises a gear selector sensor 25 and the step of determining whether a gear ratio of the power transfer unit is selected is based on a signal from the gear selector sensor (Col. 3).

***Allowable Subject Matter***

Claims 11-20 are allowed.

Claims 2-5, and 8-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ogane, Morimoto, Hoshiba, Tani, and Matsubara have been cited to show similar stall mitigation methods.

**FACSIMILE TRANSMISSION**

Submission of your response by facsimile transmission is encouraged. The central facsimile number is (571) 273-8300. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see MPEP 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses

Art Unit: 3681

requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check.

Responses submitted by facsimile transmission should include a Certificate of Transmission (MPEP 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to the Patent and Trademark Office (Fax No. (571) 273-8300) on \_\_\_\_\_ (Date)

Typed or printed name of person signing this certificate:

\_\_\_\_\_  
\_\_\_\_\_

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roger L. Pang whose telephone number is 571-272-7096. The examiner can normally be reached on 5:30am to 4:00pm.
